**Image Tube Diameter:** 38mm ( actual 37.84mm)  
**Camera Coupling:** C-Mount  
**C-Mount Threads:** 1.00" x 32 TPI  
**Clear Aperture of C-Mount:** 20.4mm  
**Inner Tube finish:** Low reflectivity coating

## Pricing and ordering info

**Catalog Number:** 0535-0012  
**List Price:** \$89.00  
**Warranty:** Unlimited 2 year period

## Product Description

The Camera Coupler is an important accessory for today's modern microscope. It allows the use of CCD cameras to image, capture and document valuable research data.

The Tower Optical Model CC10X is an optical coupler for various microscopes with a 38mm photo port such as Nikon, Olympus, Zeiss and Leica. The CC10X is a 1.0X low profile C-Mount adapter suitable for cameras with up to 1" format CCD sensors. The CC10X provides a clear aperture of more than 20mm to provide capturing more of the microscope image for the camera.

The Model CC10X catalog part number is 0535-0012.
