Optics Manufacturing

Fall 2006

*From: Mel Kantor, President*

## ***New Optics Assembly Capability Added To Tower Optical Corp.***

Tower Optical is now proficient at the manufacturing of, and alignment of all mechanical and electro-optical assemblies for commercial and military applications. This includes bonded lenses and prism assemblies.

Such proficiencies now include:

- Beam Combiners
- Window Assembly
- Rifle Scopes
- Reflector Assembly
- IR Optics for Military and Commercial Camera Applications.
- Cell Null Lens Assembly
- LED Assembly
- Mirror Mounts

Joining Tower as Director of Assemblies and Special Projects is Ken O'Reilly, a 20 year veteran of the photonics industry with key, hands-on experience. Ken has worked with major defense contractors in helping to design M2A2 I-BAS & I-TAS production systems for Long Range Advanced Scout Surveillance Systems (LRASE) for HUM-V and Bradley Infantry Fighting Vehicle, and other key optical systems for HUM-V and Bradley carriers. Ken is also certified in Assembly and Inspection Operations from the Hensholdt AG Zeiss Group.

Please feel free to contact Ken with any questions at [koreilly@toweroptical.com](mailto:koreilly@toweroptical.com).
